BUREAU OF WATER PROTECTION
OFFICE OF THE DIRECTOR

FEB 03 2010

February 1, 2010

Paul Stacey,
Bureau of Water Protection
Department of Environmental Protection
79 Elm St,
HARTFORD, CT 06106

SUBJECT ; Support for the new Streamflow Regs

I strongly support implementing the new streamflow regs and want them completed without being weakened. I also support elimination of Class 4 as proposed, so that some measure of protection will be provided for all streams.

My support for these new regulations is based on my firm belief that when our scientists and governmental authorities realize and take action to tap the potentials for primary water, the present growing "shortages" of potable water can be eliminated in Connecticut as well as in most other areas of our world !

Please take time to review the references and Salzman's work now available for free downloading on www.newwatersources.org.

Sincerely

Roger Willcox
